

ASSEMBLY INSTRUCTIONS:

- A) Install mounting rails in enclosure so that oblong slots on fixed shelf (item 1) will line up with mounting holes on rail.
- B) Measure vertically from bottom of rack to desired hole on mounting rail. Locate shelf at this height on all 4 rails.
- C) Use shelf spacer (item 2) between rail and shelf, (only req'd for certain rail types), and 1 washer (item 3) between screw head and shelf as shown, typical 4 places.
- D) Secure fixed shelf using 10-32 screws (item 4) through oblong slots and into tapped holes on rails as shown
